For Immediate Release

“Mouser Machine” and Tony Kanaan Perform Well at Toronto Indy *Strong Performance Moves Kanaan up in Overall Point Standings*

July 10, 2012 – [Mouser Electronics](http://mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today saw Tony Kanaan battle to a 4th place finish at the Honda Toronto Indycar Race. Kanaan has had a string of Top 5 finishes placing him at 6th in overall points for the Indycar World Championship.

The Honda Indy Toronto track is a challenging street circuit with 11 turns and is 2.824-km or 1.755-mi in length. The race makes its way through the streets of downtown Toronto near Exhibition Place and the beautiful Lake Ontario. Kanaan, racing in the No. 11 GEICO/MOUSER ELECTRONICS – KV Racing Technology Chevrolet/Firestone IndyCar, started mid-pack in Sunday’s race. Kanaan charged ahead early, easily moving up through the field and even battling for the lead with eventual winner Ryan Hunter-Reay.

“Tony’s driving skills never cease to amaze me,” said Larry Johannes, Mouser Electronics’ Vice President of Strategic Marketing. “Throughout the 2012 season, Tony has given the competition a run for their money. He doesn’t back down and he always gives it everything he’s got – every race. Mouser is proud to be behind a team with this kind of drive to succeed.”

“It’s been a wild day,” Kanaan said after the race. “It didn’t help with the drive-through penalty, but I had a great restart passing six cars and the guys did a great pit stop. We made a mistake using an old set of reds (alternate tires) in the last stint, so I was losing a lot of places, but I again managed to make it up on the restart. We are getting so close to a win, just not quite there yet.”

To view a video interview with Tony Kanaan during his recent visit to Mouser’s corporate headquarters, click on <http://mou.sr/GSTKHT>. This year so far, Kanaan has collected six Top-6 showings in the first 10 races of the 2012 season – highlighted by an impressive podium finish at this year’s Indy 500. The next IZOD IndyCar Series event is the Edmonton Indy on Sunday, July 22. The track is a 13-turn, 3.579 km temporary circuit set up at the Edmonton City Centre Airport near the downtown area of Alberta, Canada.

Mouser’s comprehensive IndyCar racing program provides a high-tech platform to showcase its valued supplier partnerships and connect with the industry’s top design engineers and electronic component buyers. Engineers are also invited to take the [Mouser 500 Challenge](#), a series of three engineering challenges to help find design solutions to various technical problems relating to the high-tech, high-speed sport of IndyCar racing.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.9 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.
