

For Immediate Release

Mouser Partners with Triune Systems to Offer Green Design Solutions

February 3, 2012 – [Mouser Electronics](http://www.mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today announced they have partnered with [Triune Systems](http://www.triune.com) to bring customers worldwide a wider range of solutions for “designing green.” Triune provides semiconductor products for portable, consumer, industrial and automotive applications.

Triune Systems specializes in analog and mixed-signal integrated circuit (IC) products with a market focus on green solutions in low power applications. Mouser customers will have access to Triune’s innovative technologies, including the revolutionary nanoSmart® circuit solution. The nanoSmart technology enables ultra-low power analog circuits which eliminate standby power losses. This patent-pending technology can extend the battery life of portable consumer electronic products, expand alternate energy source applications such as RF and thermal energy harvesting systems, and enable new autonomous systems that run maintenance-free. Triune Systems is committed to applying its deep expertise in analog and mixed-signal integrated circuit development to drive innovative solutions to tomorrow's power management challenges.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What’s Next in advanced technologies. Mouser offers customers 19 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics’ website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 325,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

About Triune Systems

Triune Systems, headquartered in Dallas, Texas, is a fabless semiconductor that specializes in analog and mixed-signal integrated circuit (IC) products with a market focus on green solutions in low power applications. With a focus on continuous technical innovation and outstanding customer support, the company enables its partners to provide more energy efficient solutions for a secure and sustainable world. For more information, visit <http://www.triunesystems.com>.
