

For Immediate Release

Mouser Announces Launch of Trompeter Product Line from Emerson Network Power Connectivity Solutions

April 5, 2012 – [Mouser Electronics](http://www.mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, today made public its new distribution agreement with [Emerson Network Power Connectivity Solutions](http://www.emersonnetworkpower.com), a business unit of Emerson Network Power, launching the Trompeter product line to Mouser's expansive line card of interconnect solutions. This new distribution agreement provides an even broader range of leading-edge RF interconnect and harsh environment solutions to design engineers and procurement professionals worldwide and builds upon Mouser's ongoing relationship with Emerson Connectivity Solutions.

The [Trompeter](#) product line from Emerson Network Power Connectivity Solutions is recognized for delivering best-in-class RF connectivity products, offering patch jacks, RF connectors, cable assemblies, HDTV digital technology and DS3 connectivity solutions that continually deliver the highest quality signal integrity for the most demanding applications in telecom, central office, broadcast, military aerospace, and instrumentation markets worldwide.

With this new global distribution agreement in place, both design engineers and buyers will be able to source and purchase from Mouser a proven line of connectivity solutions that span communications, video transport, medical, security, military, aerospace, commercial electronics and harsh environments through Emerson Network Power Connectivity Solutions.

Krystal Jackson, Mouser Vice President of Interconnects, expresses, "We are extremely pleased to expand our relationship with Emerson Connectivity Solutions by adding the Trompeter product line of leading interconnect solutions. This will enable us to provide our customers with the industry's latest, most advanced interconnects available for new designs."

"Our partnership with Mouser continues to grow across the multiple product lines Emerson Connectivity Solutions has to offer," says Bret Murphy, Emerson Connectivity Solutions Manager of Channel Strategy & Programs. "As we expand our relationship, we look to Mouser to give us the coverage, logistics and market penetration in all regions to reach the design engineering community. They continue to thrive on cutting edge technology and service platforms that we are very pleased to be a part of."

Emerson Network Power Connectivity Solutions has a wide range of cable assemblies and connectors suited for RF, Microwave and Fiber Optic signal transmission. Emerson is a vertically integrated supplier of custom, fixed and semi-rigid cable assemblies from DC to 50 GHz. The product lines deliver custom-engineered products and solutions to satisfy the most demanding and complex requirements for wireless communications, military, telephony and data networks and industrial applications.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 8.7 million products to locate over 2.8 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Emerson Network Power

Emerson Network Power, a business of Emerson (NYSE:EMR), protects and optimizes critical infrastructure for data centers, communications networks, healthcare and industrial facilities. The company provides new-to-the-world solutions, as well as established expertise and smart innovation in areas including AC and DC power and renewable energy, precision cooling systems, infrastructure management, embedded computing and power, integrated racks and enclosures, power switching and controls, and connectivity. The solutions are supported globally by local Emerson Network Power service technicians. Learn more about Emerson Network Power products and services at <http://www.emersonnetworkpower.com>.

About Emerson

Emerson (NYSE: EMR), based in St. Louis, Missouri (USA), is a global leader in bringing technology and engineering together to provide innovative solutions for customers in industrial, commercial, and consumer markets around the world. The company is comprised of five business segments: Process Management, Industrial Automation, Network Power, Climate Technologies, and Commercial & Residential Solutions. Sales in fiscal 2011 were \$24.2 billion. For more information, visit <http://www.emerson.com>.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2.8 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 325,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.
