Multi-Tech Systems European Version SocketModem® iCell / Cell Embedded Wireless Modems

Mansfield, Texas, USA – May 24, 2010 – Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking new product from Multi-Tech Systems.

The European version of the Multi-Tech Systems SocketModem® iCell and SocketModem Cell embedded wireless modems are complete, ready-to-integrate communications devices that offer standards based quad-band GSM/GPRS Class 10 performance. The Multi-Tech Systems SocketModem iCell and SocketModem Cell embedded wireless modems allow developers to add wireless communication to products with a minimum of development time and expense. The European version of the iCell and Cell quadband modems -- MTSMC-G2-GP-ED (iCell), MTSMC-G2-IP-ED (iCell), and MTSMC-G2-V-ED (Cell) – are set to a 900/1800 MHz default. The iCell embedded wireless modem contains an embedded Universal IP stack that has the intelligence to allow for automatic/persistent connectivity for mission critical applications and enhanced M2M functionality. These Multi-Tech Systems communication devices feature universal socket connectivity and provide packet data up to 85.6K bps. To learn more, visit <http://www.mouser.com/multitechicell>.

Known for its focus on design engineers with its broad product line, unsurpassed customer service, advanced on-line catalog and innovative product marketing, Mouser continuously offers customers the newest products and latest technologies for their new design projects.

Mouser Electronics' website with interactive online catalog is updated daily and searches over 6.7 million products to locate over a million part numbers available for easy online purchase. Plus, it houses downloadable data sheets, supplier-specific reference designs, application notes, technical design information and engineering tools.
