## For Immediate Release

### **Mouser Adds ChipSESD Protection for Small ICs**

*TE Connectivity's ChipSESD Protection Devices in Standard 0201 & 0402 Packages*

**July 26, 2011** – [Mouser Electronics](http://www.mouser.com), Inc., regarded as a top design engineering resource and global distributor for semiconductors and electronic components, is stocking [TE Connectivity](http://www.teconnectivity.com)'s ChipSESD silicon ESD protection products in SMT package sizes 0201 and 0402.

Easier to install and rework than traditional semiconductor-packaged ESD devices, ChipSESD devices are offered in a traditional SMT passive packaging configuration. TE's ChipSESD devices feature bi-directional technology allowing placement on the PCB without orientation restraints, eliminating the need for polarity inspection. ChipSESD devices help to protect sensitive ICs in small portable electronics, LCD and plasma displays, as well as HDMI, USB, DisplayPort, and other high-speed data lines or low-voltage antenna interfaces.

TE ChipSESD devices' low-leakage current (1.0 $\mu$ A max) reduces power consumption and their fast response time (<1ns) helps equipment to pass IEC61000-4-2, level 4 testing. To learn more, visit <http://www.mouser.com/teChipSESD/>.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 17 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

### **About Mouser Electronics**

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 2 million products online from more than 450 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 300,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

### **About TE Connectivity**

TE Connectivity Ltd. is a global technology company with fiscal 2010 sales of US\$12.1 billion to customers in more than 150 countries. We design, manufacture and market products for customers in a broad array of industries including automotive; data communication systems; consumer electronics; telecommunications; aerospace, defense and marine; medical; energy; and lighting. With approximately 7,000 engineers and worldwide manufacturing, sales and customer service capabilities, we are a recognized leader in many of the industries we serve. More information on TE can be found at [www.te.com](http://www.te.com).

### **Trademarks**

Mouser and Mouser Electronics are registered trademarks of Mouser Electronics, Inc. TE Connectivity (logo), TE connectivity (logo) and TE (logo) are trademarks of the TE Connectivity Ltd. family of companies. All other products, logos, and company names mentioned herein may be trademarks of their respective owners.
