Signal Integrity at TE

TE Connectivity gets the best performance out of connectors by applying system-level signal integrity design expertise to each high-speed product. Our modeling and simulation skills are second to none with global expertise in the U.S., Europe, and Asia. Our global presence places simulation, modeling, and system layout experts next to the customer.

Modeling and Simulation

At TE the design process starts with signal integrity. Signal integrity engineers use sophisticated 3D tools to provide accurate connector and footprint via pattern performance prior to production. TE has the tools and expertise to get the right answer.
