

07/31/2012

Dear Customer:

This is an announcement of a change to a device or set of devices that is/are currently offered by SVA (Division of Texas Instruments). The details of this change are on the following pages.

We request you acknowledge receipt of this notification within **30** days of the date of this notice. Lack of acknowledgement of this notice within 30 days constitutes acceptance of the change. If you require samples or additional data to support your evaluation, please request within 30 days.

The changes discussed within this PCN will not take effect any earlier than **90** days from the date of this notification, unless customer agreement has been reached on an earlier implementation of the change. This notification period is per TI's standard process.

This notice does not change the end-of-life status of any product. Should product affected be on a previously issued product withdrawal/discontinuance notice, this notification does not extend the life of that product or change the life time buy offering/discontinuance plan.

For questions regarding this notice, contact your local Field Sales Representative or the PCN Manager (PCN_ww_admin_team@list.ti.com).

Sincerely,

PCN Team
SVA Change Management

FORECAST CHANGE NOTIFICATION

PCN # 20125304 Revision A

Title Of Change: Qualification of copper wire as alternate bonding material for selected products in TSSOP, SOIC, SOT23 and MSOP Packages

Publish Date: 07/31/12

Revision History of PCN:

Rev	Action Date	User ID	Action Name	Action Comments
---	-----	-----	-----	-----
A	07/30/2012	CJMKSC	Create PCN	

This is to inform you that a design and/or process change will be made to the following product(s). This notification is for your information and concurrence. This is a preliminary notification. A final PCN will be issued when qualification is complete and data is available.

If you require data or samples to qualify this change, please contact National Semiconductor within 30 days of receipt of this notification.

If you have any questions concerning this change, please contact:

DESCRIPTION OF CHANGE AND PRODUCTS AFFECTED

The purpose of this Product Change Notification (PCN) is to inform you that copper wire is being qualified as an alternate bonding material for selected products in SOT23, SOIC Narrow, SOIC Wide, TSSOP, and MSOP Packages as follows:

Packages	Before	After
=====	=====	=====
SOT23	Gold Wire (Au wire)	Gold and Copper Wire
SOIC Narrow	Gold Wire (Au wire)	Gold and Copper Wire
SOIC Wide	Gold Wire (Au wire)	Gold and Copper Wire
TSSOP	Gold Wire (Au wire)	Gold and Copper Wire
MSOP	Gold Wire (Au wire)	Gold and Copper Wire

This notification is another of several phases/customer notifications for Copper wire qualification that will occur in the coming year and contain selected products (non-military & non-automotive) from SOT23, SOIC Narrow, SOIC Wide, TSSOP, and MSOP package families. Refer to the part numbers affected section below for actual device listing.

REASON FOR CHANGE

The qualification of copper as an alternate bond wire 1) further supports the continuity of supply of all affected products and 2) serves to improve product performance through reduced bond wire impedance.

ANTICIPATED IMPACT ON FORM, FIT, FUNCTION, QUALITY, OR RELIABILITY (POSITIVE / NEGATIVE)

There is no change to the product quality or reliability. All current product specifications, performance parameters and characteristics will remain unchanged. The expectation is that there will not be an effect on customer applications.

Please note that the exact implementation date for each product will depend on a combination of the release schedule and inventory associated with the specific product.

SAMPLE AVAILABILITY DATE SCHEDULE

If you require samples or additional data to support your evaluation, please request within 30 days of this notification. The availability of samples will depend on the actual device(s) requested.

CHANGES TO PRODUCT IDENTIFICATION RESULTING FROM THIS PCN

Not applicable. After conversion, product may contain either Au or Cu bond wire with no discernable package or top marking for either.

During the customer qualification period for Cu bond wire conversion, Texas Instruments may switch customers to spec flow AULF (replace NOPB) and AUPB (replace standard PB plated) to assure product containing Au bond wire continues to be shipped until the customer qualification is complete.
