| <b>Change Description:</b>         | Amphenol Dongguan China factory plans to develop stamping and plating capability for Airmax VS 4 pair and 5 pair Vertical Header.                                                                                                                                                                                                                      |                                                                                 |
| <b>Reason for Change:</b>          | As Airmax VS assembly production had been integrated into Amphenol DG factory, to shorten actual production lead time, we plan to develop Airmax VS 4 pair and 5 pair Vertical Header stamping and plating in DG factory so that our production team can better align component and assembly production activity to reach better delivery flexibility. |                                                                                 |
