Re: Discontinuation Notice – DX80 Multihop Ethernet Radios

---

Dear Banner Channel Partners,

Effective May 1st, 2024, Banner Engineering is discontinuing the Wireless DX80 Multihop Ethernet Radios. These radios require a critical component that has been obsoleted by our supplier and no immediate replacement is available. For in-facility wireless ethernet radio applications, the R70ER9MQ or R70ER2MQ are recommended replacements. Banner will accept return of unused stock of these items in their original packaging and whose manufacturing date is no more than two years old through May 15th, 2024 under standard RMA.

See Table 1 for a list of product models which are now obsolete, along with their closest, and recommended replacement.

Table 1. Obsolete DX80 Multihop Ethernet Radios and recommended replacement.

ITEM	DESCRIPTION	Replacement
18385	DX80ER9M-H	R70ER9MQ
18386	DX80ER2M-H	R70ER2MQ
801572	DX80ER9M-H-AN	N/A
88425	DX80ER2M-H-KR	N/A
