Description of Change:

Broadcom is adding Flextronics in Malaysia and Foxconn in Vietnam as additional assembly sites for the part numbers listed in the table. These part numbers are currently assembled in Sanmina Thailand. Flextronics and Foxconn are already used to supply other DCSG and NIC storage adapters. There will be no changes to the design and the component vendors will remain the same. Adding an additional assembly site will help mitigate future component supply constraints to ensure supply continuity of adapters and accessories.

Effect of Change:

There is no change to form, fit, or functionality.

Your sales and marketing team will work with you to update any OEM specific labels to reflect the new site location.

Effective Date of Change:

Adapters assembled at these alternate sites will be phased in after March 1, 2025. After this date, these SKUs may be sourced from Foxconn Vietnam and Flextronics Malaysia as indicated in the table.

Please contact your Broadcom field sales engineer or Contact Center for any questions or support requirements. Please return any response as soon as possible, but not to exceed 30 days.
