

## **Broadcom Product Advisory Taiwan BSMI Code Change**

**Issue Date: July 1, 2025**

### **Description of Change:**

Taiwan recently notified Broadcom of a change to its BSMI code from D3B320 to D3H413. The update is due to Broadcom changing its official company entity name in Taiwan from *Avago Technologies International Sales Pte Ltd Taiwan Branch* to *Avago Technologies Taiwan Limited*. While this change has been planned, the new BSMI code was only provided recently with instructions to apply it to shipping products after July 1, 2025. This is required in order to be compliant to Taiwanese import requirements.

### **Parts Affected:**

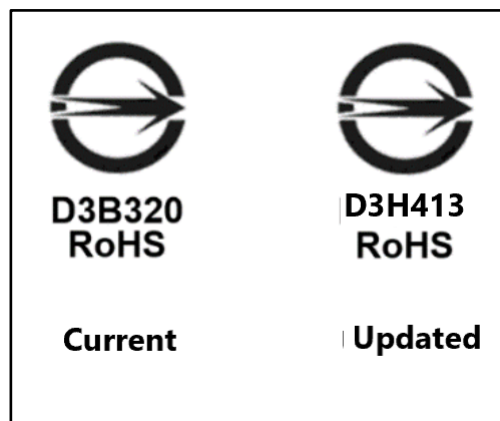

- All standard DCSG Storage and NIC adapter SKUs.
- Custom adapters that do not carry the Broadcom BSMI code are not impacted.

### **Effect of Change on Fit, Form, Function**

The BSMI code is screen printed on the adapter PCB. Broadcom will temporarily use labels to indicate the new code until the PCB screen printing is updated.

Adapter certification documents are in the process of being updated. The certifications will be posted on ESP, and the individual storage and NIC adapter product pages located at: <https://www.broadcom.com/products/>

The following picture shows the current and updated BSMI code.

**Recommended Action by the Customer:**

Acknowledge this Product Advisory and ensure your respective receiving inspection departments are aware of this change.

**Effective Date of Change:**

Product shipments using the new BSMI code will begin on or after July 1, 2025. Timing of shipments will vary by part number depending on customer demand and inventory levels.

---

Please contact your Broadcom field sales engineer or Contact Center for any questions or support requirements. Please acknowledge the receipt of the notice within 30 days of delivery. Lack of acknowledgement within 30 days constitutes acceptance of the change per JEDEC
