Title: Han® Module Clamp

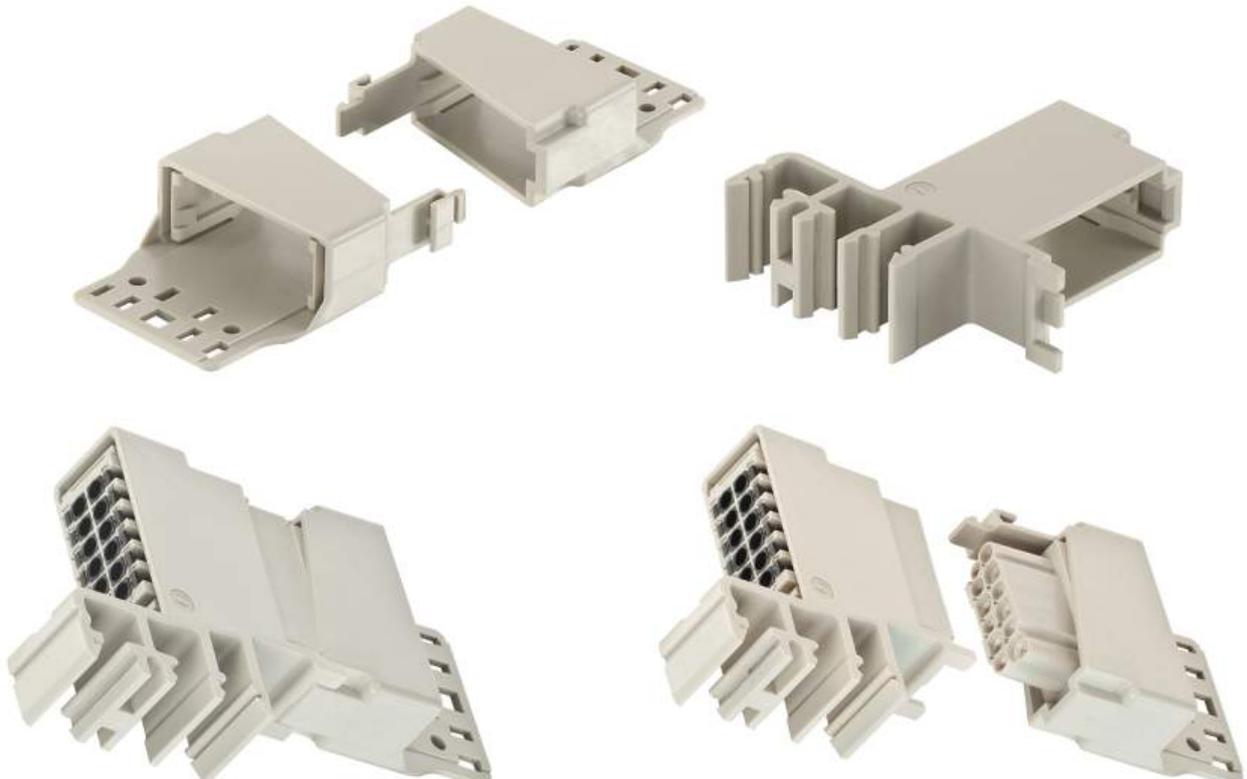

Dear Ladies and Gentlemen,

As already announced during the last C&N Forum in September 2012 we want officially inform about the design improvement of the module clamp 09 14 000 0302/ 09 14 000 0303/ 09 14 000 0312/ 09 14 000 0313

old design

new design

The main benefit is that this module clamp is now suitable for all single modules. That means it can be used in many new applications, e.g. in combination with the Han[®] RJ45 Module, the Han[®] MegaBit module, Han-Quick Lock[®] modules, etc.

The second point is that the width is reduced from 25 to 18 mm so that the new module clamp is app 30 % more space saving. Therefore customers can save a lot of space in their switch cabinets.

Finally the handling and functionality has been improved a lot. Now it is possible to connect and disconnect easily with one hand. The insertion and removal of modules is also very easy now.

Features and advantages of the new design:

- Suitable for all single modules module
- The width will be reduced by app 30 % from 25 mm to 18 mm
- Smooth edges
- Easier handling
- Mating and unmating with one hand
- Easy insertion and removal of the modules
- The existing removal tools can be used (09 99 000 0331 + 09 99 000 0828)
- More slots for cable ties
- 100 % mating compatible to the existing module clamps
- No price increase

Part numbers

The part numbers will be same, but there will be a new revision level as shown following:

09 14 000 0302.00	→	09 14 000 0302.01
09 14 000 0303.00	→	09 14 000 0303.01
09 14 000 0312.00	→	09 14 000 0312.01
09 14 000 0313.00	→	09 14 000 0313.01

Furthermore we would recommend that the module clamp 09 14 000 0301 and 09 14 000 0311 should be replaced by 09 14 000 0312.

Action LS

Please inform all concerned customers about this changing until April 2013.
This changing will be done in July 2013.

Best regards,

Heiko Meier**HARTING Electric GmbH & Co. KG**
