Discontinuation of railway certificates for Enviroflex and GX cables

Dear Customer

Harmonization of railway standards is on-going in Europe. DIN 5510-2 is replaced by the EN 45545 standard, requiring technical product improvements. This also influences our RF railway cable portfolio.

GX and Enviroflex cables are replaced by the recently launched RADOX[®] RF series supporting the European Standard EN 45545 and fulfilling the highest level for indoor cables HL3. GX and Enviroflex cables supporting the old DIN 5510-2 standard will be discontinued for the railway market. The products stay available, however valid certificates will only be provided until the end of 2017. Please refer to the appendix for replacement types.

Yours sincerely

Mathias Vetter

ENVIROFLEX_400	22512280	RADOX_RF_400	85023720

Confirmation

I confirm that I am aware about the discontinuation of railway certificates for all HUBER+SUHNER Enviroflex and GX RF railway cables (as explained in letter: 180123_Enviroflex and GX RF cable railway certificate discontinuation). I understand and accept that they will no longer be renewed.
