

The picture on the left shows the old style 140 series mounted with the capacitor bracket to an enclosure with the leads passing down through the enclosure

The picture on the right shows the dimension for the mounting centers on the bracket at 1.875"

The picture on the left shows the new style of tabs mounted on the same enclosure with the leads going down through the enclosure

The picture on the right shows the dimension for the mounting centers which is the same as the old style

This last picture again is on the same enclosure but shows the leads going up and the mounting has the addition of 2 – 1.0" threaded standoff's to fasten the tabs to the enclosure
