Dear Distribution Partner,

As of today, August 17th, 2026, design changes are in effect for series [C3RWT](#) and [C3RWTG](#) 3R wiring troughs. These updates aim to streamline installation and use of the trough.

Changes to the design include:

- Padlocking hasp removed
- Keyhole cover slot with self-tapping screw replaces clipnuts
- Rear mounting holes no longer raised (embossed)

This is a rolling change, so existing stock of the old design may be in circulation until depleted. Please don't hesitate to reach out to us with any questions regarding the update.

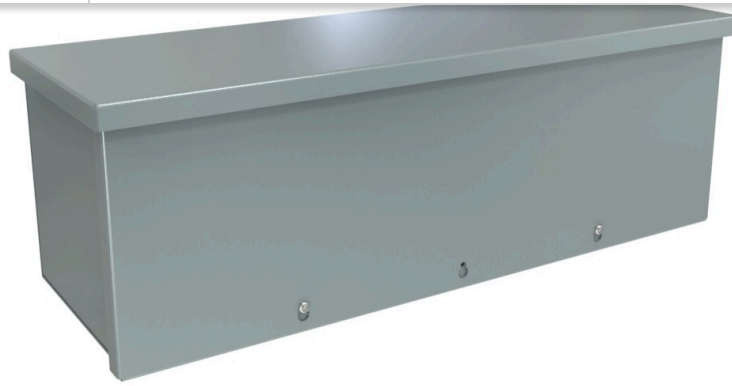

Sincerely,
The Hammond Team
