

PRODUCT DISCONTINUATION

PD_034_14

PL = 33

Reason: **Discontinuation of none and slow moving KF2 6.5kV product portfolio**

IFX has successfully launched the 6.5kV KE3 IHV product family since 2008 with new IGBT3 Trench-Field-Stop technology and improved power density in an extended portfolio. The rapidly increasing demand of the new KE3 products in the last years has lead to a fast declining demand and low quantities of products within the KF2 portfolio. The sale of the KF2 products is no longer economical and therefore IFX will discontinue the 6.5kV KF2 IHV modules. An equivalent one to one replacement can be achieved with the recommended modules. Please obey the datasheet limits and driving conditions.
