To: Valued Customer

From: Littelfuse Product Management

Subject: **345-Series body marking**

Littelfuse Product Management would like to inform you that in order to eliminate redundancy with VDE certification, Littelfuse has decided to eliminate the SEMKO marking on the 345-series Shock Safe circuit board mount enclosed fuse holders.

There are no changes in form, fit, function, or materials to our part. Current ratings for all other approving agencies remain unchanged:

UL 16A, 250V

CSA 15A, 250V

VDE 10A, 250V

The only change is the elimination of the legend "6.3A 250V" from the holder's plastic body. This modification is effective immediately.

Affected part numbers:

03450101H

03450101HXAB010

03450101HXB

03450101X

03450101ZX010

03450101ZX010RE

03450101ZXAB010

03450101HX010

03450121H

03450121X

0345 Series - Prior version

0345 Series – Current version

Please contact your local Littelfuse Sales Office should you need further assistance.
