**Subject:** Change in Die Attach Epoxy from Sumitomo CRM1146A to Ablebond 84-3J

**PCN #:** PCN-00578

Dear Valued Customer:

Please accept this letter as formal notification that a change to the die attach epoxy on the parts in the attached list is being made.

This change has become necessary in order to ensure the continuous and timely supply of material to the market. Please note that this change in specification is effective immediately.

The new epoxy has been fully qualified and there is no change in form, fit, function, or reliability.

You are receiving this notification because you have purchased one or more of the subject parts within the past two years.

If you should have any questions or concerns in respect to this change please do not hesitate to contact me immediately for discussion.

Sincerely,

**Loren J. Reifsteck**

<b>PCN Number:</b>		PCN-00578	<b>PCN Date:</b>		6-August-13
<b>Title:</b> Change in Die Attach Epoxy from Sumitomo CRM1146A to Ablebond 84-3J					
<b>Scheduled Production Ship Date:</b>		Immediate	<b>Estimated Sample Availability</b>		N/A
<b>Change Type:</b>		Assembly Materials			
<b>PCN Details</b>					
<b>Description of Change:</b>					
The die attach material is being changed from Sumitomo CRM1146A to Ablebond 84-3J.					
<b>Reason for Change:</b>					
Ablebond 84-3J is the epoxy recommended by the assembly subcontractor for these package types and has been in high-volume production for many years. The Sumitomo CRM1146A epoxy is a low volume epoxy used only by MACOM and long lead times are impacting on-time delivery to our customers. Therefore, MACOM is converting to the high-volume epoxy to ensure continuous supply.
