PRODUCT CHANGE NOTICE
PCN Form (D4-E000-73)

PCN#26-011 **NOTIFICATION DATE: November 2, 2026**

MODELS AFFECTED

Affected Models Listed on Pages 3-10

EXTENT OF CHANGE:

Replacement of supplied internal Diode Quad with equivalent, qualified supplier part.

EFFECT OF CHANGE:

Based on evaluations done to date we do not anticipate change to Function (performance). No change to Fit (dimension) or Form (appearance). However, Mini-Circuits will continue to do our due diligence in verifying the change in material and will provide a separate notification of change to Function (Performance) in situations where changes are needed.

REASON FOR CHANGE:

This change is required due to the closure of the existing fab. No further purchases of materials are allowed at the time of this PCN. Mini-Circuits will continue supporting existing customers until our inventory is exhausted. We reserve the right to allocate available products based on existing inventory.

EFFECTIVE DATE OF CHANGE:

Immediate. Product of both versions may be shipped concurrently based on stock availability.

FREQUENTLY ASKED QUESTIONS:

1. **What is the reason for this PCN?**
The original Schottky diode manufacturer has decided to close its fabrication facility (fab) and offered only a limited last-time buy (LTB) opportunity. Mini-Circuits was able to qualify an alternative supplier. In accordance with Mini-Circuits' procedures, a PCN is issued whenever there is a change in diode, even if the replacement results in a model that is equivalent in form, fit, and function.

2. **What actions did Mini-Circuits take in preparation for this change?**
Mini-Circuits took this change very seriously and took immediate actions including:
- Placed a last-time buy order with the original supplier to help maintain product availability and support customers' transition.

This document and its contents are the property of Mini-Circuits.

PRODUCT CHANGE NOTICE
PCN Form (D4-E000-73)

- Identified and qualified an alternative diode quad.
- Tested the replacement diode quad in several models covering a wide range of frequencies and performance specifications representative of all models using the original diodes.

3. **What is Mini-Circuits' qualification process?**
Mini-Circuits follows a qualification process that includes the following steps:

- Work with the new diode supplier to establish and execute a qualification plan.
- Test and qualify the replacement diodes.
- Identify representative models for evaluation.
- Incorporate the replacement diodes into the selected models and collect comprehensive test data to verify performance.

4. **Will all the models affected by this change be requalified?**
The replacement diodes have been successfully qualified and used in selected models which operate at comparable frequencies, exhibit similar performance requirements and circuit complexity as the rest of the affected models. This allows us to qualify all the affected models with similar or increased performance margin by similarity with our qualified selection. Samples of new version may be available upon request (9-12 months lead time for selected qualified models, 6-9 months lead time for models qualified by similarity).

5. Will the newly qualified diode be a direct equivalent to the existing diode?
The newly qualified diode has similar performance characteristics to the original diode and is intended to provide equivalent form, fit, and function. Qual reports may be available upon request.

6. Can customers continue to receive parts manufactured with the original diodes? Can customers place last-time buy orders?
Customers may place a last-time buy order for the parts with the original diode. Mini-Circuits will continue manufacturing models using the original diodes to support existing orders. However, based on limited availability of the remaining diode inventory we reserve the right to review last-time buy orders for acceptance. Please, contact your Account Manager or Sales@minicircuits.com to place an order.

7. Will the part numbers change? How will the customers know which version is supplied?
There will be no change to the part numbers. Mini-Circuits will keep finished goods inventory with the original and new diode in separate stock locations. Last-time orders will need to clearly indicate which version is preferred. If not stated, Mini-Circuits reserve the right to ship at our discretion. We will not be combining products of original and new versions on individual reels.
