Integration of Inspection and Packaging Processes

55763 series (2.0MM W-TO-B DUAL CONN)

Overview

- We conduct coplanarity inspection by manual after in-line section for inserted Terminal and Nail, and then conduct manual emboss packing. We will convert this manual inspection to in-line inspection. The right picture shows the difference between current and after change. Blue letters indicate changed process and contents.

Part No
557632070
557633070
557634070

After Picture

- **Product Impact**

This change is to automate manual work (In-line inspection) and its purpose is to reduce quality risk caused by manual work and improve productivity, which will not affect product's shape and functionality.
We will conduct the verification of product and equipment after completing modification to make sure that it's same as current condition.

- **PPAP and samples available upon request**
