Please note if Samples are not requested as per Customer Samples Request date, it may take additional 4-6 weeks to arrange Samples.			
Traceability Code Markings / Date :	Date code		

Before Picture

Overview

- A minor design change will be made to all series 39516 part numbers. The Change includes:
 - Adding air slots near the terminal exit of the housing to offer improved solder fill in excess of the industry standard defined by IPC-J-STD-001 (the international standard for solder processing).
 - Due to the existing design already meeting the solder standard, the implementation of the design change will be a "running change". This means there could be a mix of the existing and the new design in the product shipment.
 - The following is an illustration of the design change.
