Product Change Notice

Type of Change: ☒ End of Life ☐ Material Change
 ☐ Facility Change or Addition ☐ Process Change
 ☐ Design Change ☐ Other- Packaging

Part Series Affected: OD/OF series (5% tolerance parts only)

Effective Date: Immediately (until stock depletion)

Date Last Time Buy: September 20th 2021

Date of Last Time Shipment: N/A

September 20th will be the last day Ohmite can accept orders for 5% tolerance OD and OF (0.25 and 0.50 watt Carbon Composition) resistors. Starting September 21st only 10% tolerance parts will be available for new orders, and those will only be sold in the E12 standard value series (referenced below).

E12 STANDARD RESISTOR SERIES

1.0	1.2	1.5
1.8	2.2	2.7
3.3	3.9	4.7
5.6	6.8	8.2

Information, data and drawings embodied in this correspondence are strictly confidential and are supplied on the understanding that they will be held confidentially and not disclosed to third parties without the prior written consent of Ohmite Manufacturing Company, Inc.

Recommendations:

Customers using E24 values which are no longer available will have to move up or down one value to procure the closest equivalent. For example, 3.6 (360, 3600, 36K, 360K) will no longer be an available value. 3.3 (330, 3300, 33K, 330K) or 3.9 (390, 3900, 39K, 390K) would be the closest values which are still available. Depending on the customer's circuit, a higher or a lower value than what was formerly available will be preferred.

Ohmite urges our Distributors to stock up on 5% parts while they are still available. Customers will need time to make the transition and will consume any 5% parts still in the channel before making the changeover. The unique characteristics of Carbon Composition resistors make them difficult to replace with alternate technologies like Carbon Film or Metal Film. Their low noise, non-inductive, and pulse energy capabilities are not present in any other type of resistor in the same small sizes. Some applications, such as audio equipment, will not use any other type in critical circuits.
