

Product Change Notification

Positronic will deem this change accepted unless specific conditions of acceptance are provided in writing within 30 days from the date of this notice.

PCN Number

PCN-10624

PCN Title

ODD, DAD, DDA, DDB, DDC, XDA, and XDB Series Design Improvement

Notification Date

14 August 2023

Implementation Date

14 October 2023

Part Description

D-sub connectors with signal contacts captivated between two insulator halves, including ODD, DAD, DDA, DDB, DDC, XDA, and XDB Series fixed-contact connectors. (Removable contact connectors are not impacted.)

Affected Part Number(s)

See affected parts [list](#).

Change Description

There are four primary changes which make up this design improvement.

- 1) The current two-piece unbonded insulator will become a one-piece unibody design, unless otherwise noted; and the contact retention mechanism will change from a system captivating contacts between two molding halves to the concurrently qualified press-in contact system.
- 2) The alignment bar (when used) will be shorter in length than the existing version.
- 3) Right angle PWB tail contacts (where applicable) will have a larger bend radius and will continue to conform to all requirements.
- 4) Solder cup contact termination lengthened.

Reason for Change

The four primary reasons for change include:

- 1) The unibody design eliminates the need for contact retaining subassembly operations.

- 2) The shorter alignment bar, with self-aligning feature, eliminates interference with the brackets and the need for gluing or tying at or above the bracket.
- 3) The larger bend radius will improve manufacturability by reducing strain on right-angle PWB tail contacts.
- 4) Lengthening the solder cup termination allows for the contact to be seated and oriented more precisely, as well as increasing ease of soldering in the one-piece insulator.

Performance Impact

There is no detrimental performance impact as a result of this change.

Distinguishable Characteristics

Printed board mount contacts shall be designed to use the larger bend radius to improve manufacturability. Board and mating dimensions are not affected.

Alignment bar will be shortened.

Solder cup contacts will increase in termination length.

Current Connector

New Right-Angle Connector

Current Female Solder Cup Contacts
(Shorter Tails)

New Seated Solder Cup Contacts
(Longer Tails)

Qualification Data

I. Qualification Testing

The scope of testing was to test seven (7) each of the following ODD connectors:

Part Number Tested

ODD78M210000
ODD78F210000
ODD78M320000
ODD78F320000
ODD78M4R7000
ODD78F4R7000

II. Testing

All testing was conducted per relevant industry standards in accordance with performance standards as listed in the relevant Positronic catalog.

Table XI, Qualification Inspection, Group I:

Visual & Mechanical (per 4.5.2)	PASS
Magnetic Permeability	N/A ¹
Maintenance Aging	N/A ²
Contact Retention (per catalog)	PASS

** The implementation date is the projected date that customers may begin to receive changed product. Based on the rate of inventory depletion of current product, the implementation date may be later, but not earlier, than the stated date. Although customers should be prepared to receive changed product on this date, Positronic may continue shipping current product until a time in which the inventory has been depleted. This would result in current product being shipped to customers after the stated implementation date.*
