## **PRODUCT CHANGE**

FROM: VINCENT KE

EFFECTIVE IMMEDIATELY, THE FOLLOWING PRODUCT AND PART NUMBERS ARE AFFECTED:

17-100934  
17-101494  
17-101604  
17-101614  
17-101654  
17-101674  
17-200321  
17-200431  
17-200451

All the above part numbers use a jack receptacle housing M28 x M28 threaded version, material was brass and was nickel plated. We have changed this housing to zinc diecast nickel plated. Reason for the change is the escalation of cost for brass material and the poor yield we had in production of the housing. Please notify your customers and make them aware of this change. If samples are required, request those from us. The existing open orders on hand, we will complete with the brass version. New orders we will build with the diecast part. The performance is not affected. Part numbers will not change. Drawings will be updated.
