Subject: Product Status Notice – Active Products

Valued Channel Partner,

Notices sent out in the past had classified some models as NFND (Not for New Design). This designation was not meant to imply that these parts are nearing end of life, only to mean there may be later released products that could also be an option for customers. We have ceased using this terminology as it was misinterpreted to mean the products designated in this way were nearing end-of-life. This is not the case.

The list below, as well as all other models listed as ACT or NPI on the latest price list are in fact active products that are not in consideration for discontinuance. Customers can be comfortable in choosing these products for inclusion on their new designs. These, as well as newer similar products, would be viable options for them in new development projects.

Specific Model Numbers below are active products that were previously listed as NFND but are active products.

Previously NFND, now active			Previously NFND, now active
