

Final Product/Process Change Notification

Document #:FPCN26212Z

Issue Date:20 Dec 2024

Title of Change:	Qualification of onsemi ISMF FAB (Malaysia) and ATO site onsemi Leshan (China) for PIN diode housed in SC70 package.
Proposed Changed Material First Ship Date:	01 Jul 2025 or earlier if approved by customer
Current Material Last Order Date:	N/A <i>Orders received after the Current Material Last Order Date expiration are to be considered as orders for new changed material as described in this PCN. Orders for current (unchanged) material after this date will be per mutual agreement and current material inventory availability.</i>
Current Material Last Delivery Date:	N/A <i>The Current Material Last Delivery Date may be subject to change based on build and depletion of the current (unchanged) material inventory</i>
Product Category:	Active components – Discrete components
Contact information:	Contact your local onsemi Sales Office
PCN Samples Contact:	Contact your local onsemi Sales Office to place sample order. Sample requests are to be submitted no later than 45 days after publication of this change notification. Samples delivery timing will be subject to request date, sample quantity and special customer packing/label requirements.
Sample Availability Date:	13 Dec 2024
PPAP Availability Date:	18 Jan 2025
Additional Reliability Data:	Contact your local onsemi Sales Office
Type of Notification:	This is a Final Product/Process Change Notification (FPCN) sent to customers. The change will be implemented at 'Proposed Change Material First Ship Date' in compliance to J-STD-46 or ZVEI, or earlier upon customer approval, or per our signed agreements. onsemi will consider this proposed change and it's conditions acceptable, unless an inquiry is made in writing within 45 days of delivery of this notice. To do so, contact PCN.Support@onsemi.com .
Change Category	
Category	Type of Change
Packing/Shipping	Packing/shipping specification change
Process - Wafer Production	New/change of backside operation (grinding/metallization) New / change of metallization /vias/contacts Move of all or part of wafer fab to a different location/site/subcontractor
Test Flow	Move of all or part of electrical wafer test and/or final test to a different location/site/subcontractor
Equipment	Production from a new equipment/tool which uses the same basic technology (replacement equipment or extension of existing equipment pool) without change of process.
Process - Assembly	Move of all or part of assembly to a different location/site/subcontractor., Change of mold compound, Change in critical dimensions of package, Change of leadframe base material, Change of lead frame finishing material / area (internal), Change of wire bonding, Change of lead and heat slug plating material/plating thickness (external), Change of product marking

Description and Purpose:

This is the notification by onsemi notifying customers of its plan to qualify PIN diode devices at onsemi ISMF fab (Malaysia) housed in SC70 package design which will be manufactured in assembly and test site, onsemi Leshan (China). onsemi ISMF fab and onsemi Leshan (China) have been an existing qualified manufacturing site for onsemi and certified with IATF16949:2016 for the wafer fabrication site and ISO/TS 16949:2009 for the assembly and Test site.

These qualification stems from the onsemi Fab Liter strategy and the resulting sale of Niigata factory; the parts identified in this notification are currently sole sourced from JS Foundry, Japan (former onsemi Niigata) and will be transferred to onsemi ISMF fab, Malaysia to ensure supply continuity. Included in the change are several bill of material changes to standardize BOM aligning to the existing onsemi diode product family and SC70 package design.

Reason / Motivation for Change:				
Source/Supply/Capacity Changes Process/Materials Change				
Anticipated impact on fit, form, function, reliability, product safety or manufacturability:				
The device has been qualified and validated based on the same Product Specification. The device has successfully passed the qualification tests. Potential impacts can be identified, but due to testing performed by onsemi in relation to the PCN, associated risks are verified and excluded.				
No anticipated impacts.				
Sites Affected:				
onsemi Sites		External Foundry/Subcon Sites		
onsemi Leshan, China		None		
onsemi, ISMF Malaysia				
Marking of Parts/ Traceability of Change:				
Changed material can be identified through assembly plant code and lot code which follow onsemi marking format.
