

Paper Circuits Classroom Pack

KIT-15818

Product Overview

11-29-2021

For the most up-to-date information, visit www.mouser.com or the supplier's website.

Description

SparkFun KIT-15818 Paper Circuits Classroom Pack teaches the fundamentals of creating an electric circuit directly on paper using simple components and eliminates the need to solder or code. This pack consists of 30 fun and informative light up robot cards that should only take between five to ten minutes to assemble. Scissors, a hole punch, tape, and any coloring supplies are needed separately to get each simple circuit card built.

A paper circuit is a functioning electronic circuit built on a paper surface instead of a PCB. Projects can range from greeting cards, to origami, to traditional art such as paintings or drawings.
