

# LilyTwinkle

DEV-11364

## Product Overview

05-16-2022

For the most up-to-date information, visit [www.mouser.com](http://www.mouser.com) or the supplier's website.

## Description

SparkFun LilyTwinkle is a tiny little LilyPad board designed to add some twinkle to a project. The LilyTwinkle is as small as some of the LilyPad sensors but has an ATTiny microcontroller. Simply sew on 4 LEDs and connect a battery and the LEDs will twinkle-fade. The LilyTwinkle is a quick and easy way to add twinkling lights to a project without any programming or a bulky mainboard.

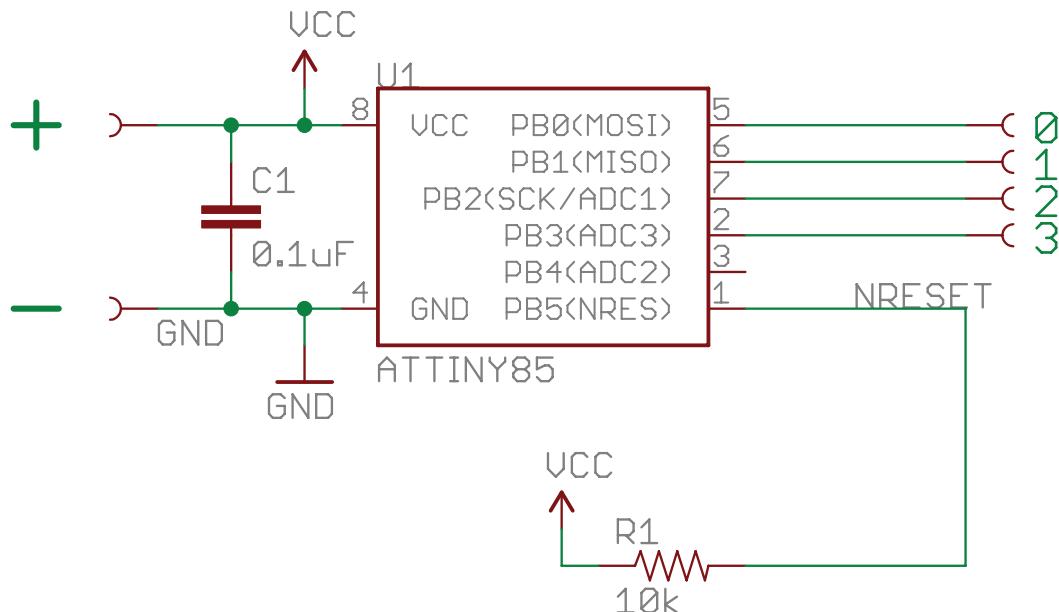

For an advanced user who wants to re-program the LilyTwinkle, the ICSP programming connectors are broken out on the back.

## Features

- 20mm outer diameter
- Thin 0.8mm PCB

## Schematic
