Description

SparkFun LoRa® ExpLoRaBLE Thing Plus is a feather-footprint development board with the Northern Mechatronics NM180100 System in Package (SiP). This development board is equipped with a UFL connector which gives a choice between BLE and RF antennas. The LoRa ExpLoRaBLE thing plus features the NM180100, Ambiq Apollo3 microcontroller, and Semtech SX1262 LoRa transceiver. This thing plus is a highly integrated LoRa module supporting 868MHz, 915MHz bands, and Bluetooth® low energy. The ExpLoRaBLE thing plus uses the Qwiic connect system, where no soldering or shields are required to connect it to the rest of the system.

Features

- 3.3V operating voltage (regulated from 5V USB-C™ supply)
- Battery charging circuit (500mA charge rate)
- UFL antenna connector - BLE and RF
- 24 GPIO
- Qwiic connector for I²C
- Compatible with “The Things Network” LoRaWAN

Specifications

- Northern Mechatronics NM180100 SiP
 - 21 Multifunctional GPIO
 - Up to eight available 14-bit ADC channels
 - Up to twenty-one 16-bit PWM channels
 - Up to two UARTs
 - An available SPI Bus
 - Up to two I²C Buses
 - Thing Plus (or feather) form-factor:
 - 2.3inch x 0.9inch Dimensions

Specifications

- Thing Plus (or feather) form-factor:
 - 2.3inch x 0.9inch Dimensions
 - Two mounting holes:
 - 4 - 40 screw compatible
 - 28 PTH Pins
 - USB-C Connector
 - 2-pin JST connector for a LiPo battery (Not included)
 - 4-pin JST Qwiic connector
- LEDs:
 - PWR - 3.3V Red power indicator
 - CHG - Yellow battery charging indicator
 - 18 - Blue status/test LED (Pin18)
 - RX - Yellow RX serial communication indicator
 - TX - Green TX serial communication indicator
- Buttons:
 - 10
 - Reset
- NM180100 SiP general specifications:
 - LoRa®:
 - 863-870MHz (Europe)
 - 902-928MHz (US)
 - 22dBm maximum transmit power
 - -147.6dBm receiver sensitivity
 - Bluetooth® 5 low energy:
 - 2.402 to 2.480GHz
 - 2dBm maximum transmit power
 - -95dBm receiver sensitivity
 - Architecture:
 - Ambiq Apollo3 ARM® Cortex® M4 with FPU up to 96MHz
 - Arduino IDE through Apollo3 Arduino core
 - Flash 1MB on-chip with external flash support
 - 384kB RAM
 - Security:
 - ISO 7816 secure interface
 - Secure key storage:
 - Secure boot
 - Secure OTA
 - External flash Inline encryption/decryption

Top view of the PCB layout for the BQ76940 evaluation module. The layout shows a rectangular board with a yellow border. It features a central microcontroller (BQ76940) surrounded by various components including capacitors, resistors, and connectors. Pin headers are located along the top and bottom edges. Dimensions are provided in millimeters (mm) for various sections of the board.
