Multicoax testing solution

Key features + benefits

Technical data

- Electrical data
- Mechanical data
- Data Multiflex 53-02 cable

Portfolio

- Breakout assemblies
- Jumper assemblies

Key features

- Ultra-precise and highly repeatable
- Best in class signal integrity
- 2.54 mm (0.1 in.) pitch centre-to-centre
- Magnetic locking mechanism
- Automatic interface protection
- Cost-efficient PCB structure

Benefits

- **Pioneering design**

The pioneering and advantageous design allows ultra-precise and highly repeatable S-parameter measurements of up to 67 GHz with minimal impedance variation at the PCB transition

- **Data analysis of up to 56 Gbps and beyond**

The broadband return loss and insertion loss characteristics over the entire bandwidth guarantee best in class signal integrity for data analysis of up to 56 Gbps and beyond

- **Shortest traces on board**

The ultra-compact design with its 2.54 mm (0.1 in.) pitch centre-to-centre makes MXPM as closely positioned as possible to the DUT/chip to keep traces short and losses low

- **Fail-safe connecting mechanism**

The integrated magnetic locking mechanism prevents inappropriately mated counterparts and ensures that the electrical connecting reference is defined as exactly as possible at any time

- **Interface protection in disconnected condition**

The automatic interface protection safeguards every single channel from mechanical damage when disconnected

- **Reduced expenses for PCB architecture**

The cost-efficient PCB structure protects expensive and sensitive PCB material, eliminates imprecise and rough surfaces and greatly reduces architecture expenses, especially since there is not mandatory requirement for hard-gold plating
