Overview

Zilog's Passive Infrared (PIR) lenses are designed to deliver high performance for the most demanding motion detection applications. Each lens is manufactured from high density polyethylene ensuring maximum IR transmissivity with well-defined beam patterns.

The ZCWM05GIV1 lens clips directly into the circuit board (PCB) over a TO-5 package PIR sensor, greatly simplifying the mechanical design.

The lens works with dual element or quad element PIR sensors and is ideal for ceiling mount applications including room lighting control and HVAC power management. The unique beam pattern provides a rectangular floor pattern for office and meeting room motion detection applications.

Features

- High density polyethylene construction
- Simple mounting – clips directly into PCB over TO-5 package PIR sensor
