

## S1D13A04 LCD/USB Companion Chip

February 2009

The S1D13A04 is an LCD/USB solution designed for seamless connection to a wide variety of microprocessors. The S1D13A04 integrates a USB slave controller and an LCD graphics controller with an embedded 160K byte SRAM display buffer. The LCD controller, based on the popular S1D13706, supports all standard panel types including the Sharp HR-TFT family of products. In addition to the S1D13706 feature set, the S1D13A04 includes a Hardware Acceleration Engine to greatly improve screen drawing functions. The USB controller provides revision 1.1 compliance for applications requiring a USB client. This high level of integration provides a low cost, low power, single chip solution to meet the demands of embedded markets requiring USB client support, such as Mobile Communications devices and Palm-size PCs.

The S1D13A04 utilizes a guaranteed low-latency CPU architecture that provides support for microprocessors without READY/WAIT# handshaking signals. The 32-bit internal data path, write buffer and the Hardware Acceleration Engine provide high performance bandwidth into display memory allowing for fast display updates. 'Direct' support for the Sharp HR-TFT removes the requirement of an external Timing Control IC.

Additionally, products requiring a rotated display can take advantage of the SwivelView™ feature which provides hardware rotation of the display memory transparent to the software application. The S1D13A04 also provides support for "Picture-in-Picture Plus" (a variable size Overlay window).

The S1D13A04, with its integrated USB client, provides impressive support for Palm OS® handhelds. However, its impartiality to CPU type or operating system makes it an ideal display solution for a wide variety of applications.

### ■ FEATURES

- Embedded 160KB Display Buffer.
- Low Operating Voltage.
- Low-latency CPU interface.
- Direct support for multiple CPU types.
- Programmable resolutions and color depths.
- Passive LCD support.
- Active Matrix LCD support.
- 'Direct' Sharp HR-TFT support.
- USB Client, Revision 1.1 compliant.
- SwivelView™ (90°, 180°, 270° hardware rotation of displayed image).
- "Picture-in-Picture Plus".
- Pixel Doubling.
- Hardware Acceleration Engine.
- Software Initiated Power Save Mode.
- Software Video Invert.
- 121-pin PFBGA or TQFP15 128-pin package.

### ■ SYSTEM BLOCK DIAGRAM

## S1D13A04

### DESCRIPTION

#### CPU Interface

- 'Fixed' low-latency CPU access times.
- Direct support for:
  - Hitachi SH-4 / SH-3.
  - Motorola M68xxx (REDCAP2, DragonBall, ColdFire).
  - MPU bus interface with programmable READY.

#### Memory Interface

- Embedded 160K byte SRAM display buffer.

#### Power Down Modes

- Software Initiated Power Save Mode.

#### Operating Voltage

- $CORE_{VDD}$   $2.0 \pm 10\%$  or  $2.5 \pm 10\%$  volts.
- $IO_{VDD}$   $3.0 \pm 10\%$  volts.

#### Clock Source

- Three independent clock inputs including dedicated USB clock (single clock possible if USB not required).
- Flexible clock source selection and divides.

#### Package

- 121-pin PFBGA.
- 128-pin TQFP15.

#### Integrated USB Features

- USB Client, Revision 1.1 Compliant.

#### Integrated LCD Controller Features

- 1/2/4/8/16 bit-per-pixel (bpp) support.
- Up to 64 gray shades on monochrome passive panels.
- Up to 64K colors on passive/active matrix panels.
- Single-panel, single-drive passive displays.
  - 4/8-bit monochrome LCD interface.
  - 4/8/16-bit color passive LCD interface.
- 9/12/18-bit Active matrix TFT interface.
- 18-bit 'Direct' HR-TFT interface.
- SwivelView: hardware rotation by 90°, 180°, 270°.
- "Picture-in-Picture Plus": displays a variable size window overlaid over background image.
- Pixel Doubling: horizontal and vertical resolutions can be doubled without any additional memory.
- Software video invert.
- Typical resolutions supported:
  - 320x240@16 bpp
  - 320x320@8 bpp
  - 160x160@16 bpp (2 pages)
  - 160x240@16 bpp
- 2D BitBLT Engine.
 

Write BLT	Transparent Write BLT
Move BLT	Transparent Move BLT
Solid Fill BLT	Read BLT
Pattern Fill	Color Expansion BLT
Move BLT with Color Expansion
