

## LI-ION BATTERY 100MAH 3.7V

**Weight** 5 g

---

### DESCRIPTION

This lithium-ion battery is small, light and durable. Through standard JST 2mm female connector, it will yield 3.7V which will supply your projects with power for a whole day (and night!). Furthermore, the battery has an implemented protection system, which prevents high voltages ( prevents over-charging), undervoltage and short circuit. That way it protects the battery, increases its lifetime and protects you from possible accidents!

**DISCLAIMER:** This battery has to be charged with a special charger that uses CC/CV principle. Li-ion batteries are dangerous! Read our tutorial (link in the top right corner) before use.

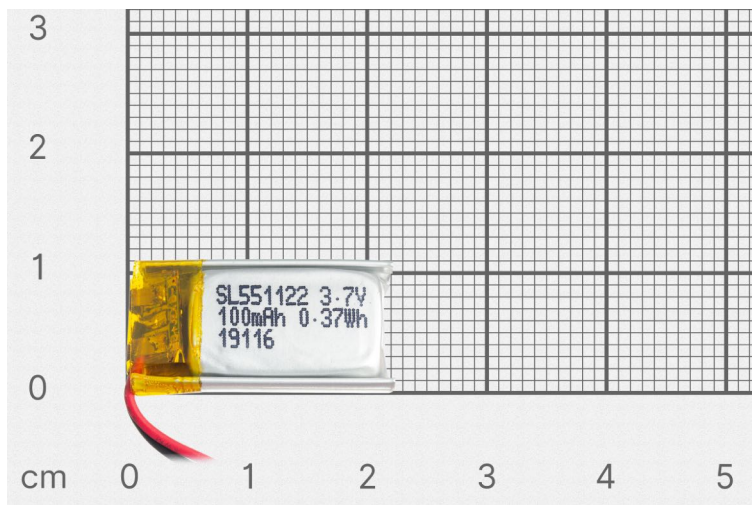

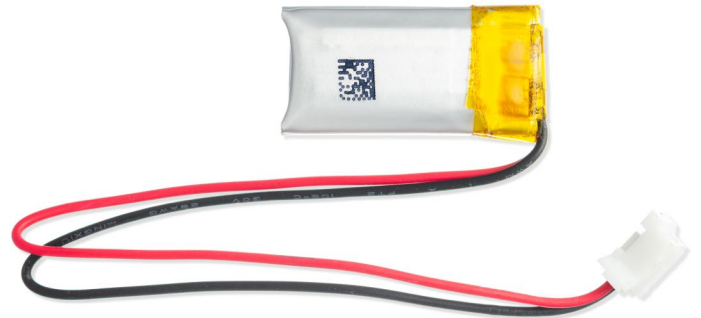

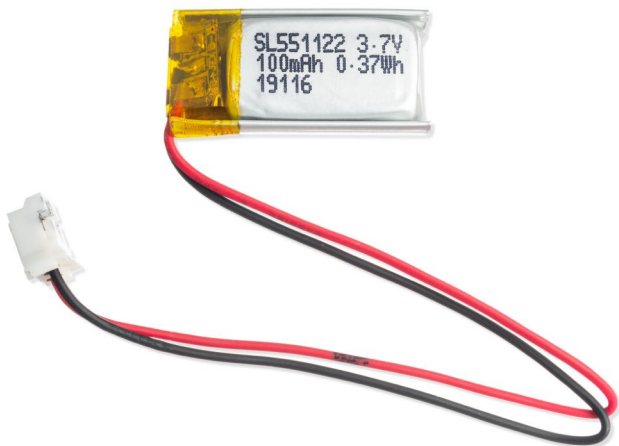

### FEATURES

- Nominal voltage: 3.7V
- Capacity: 100mAh
- Standard JST-PH-2mm connector
- Dimensions: 5 x 22 x 11 mm / 0.2 x 0.9 x 0.4 inch
