

LI-ION BATTERY 680MAH 3.7V

Weight 14 g

DESCRIPTION

This lithium-ion battery is small, light and durable. Through standard JST 2mm female connector, it will yield 3.7V which will supply your projects for a whole day (and night!). Furthermore, the battery has an implemented protection system, which prevents high voltages (prevents over-charging), undervoltage and short circuit. That way it protects the battery, increases its lifetime and protects you from possible accidents!

DISCLAIMER: This battery has to be charged with a special charged that uses **CC/CV** principle. Li-ion batteries are dangerous! Read our tutorial (link in the top right corner) before use.

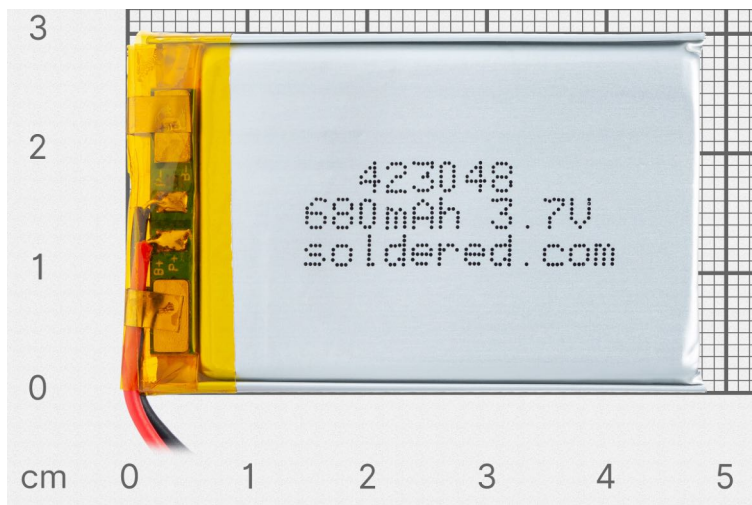

FEATURES

- Nominal voltage: 3.7V
- Capacity: 680mAh
- Standard JST-PH-2mm connector
- Dimensions: 48 x 30 x 4 mm / 1.9 x 1.2 x 0.2 inch
