

LI-ION BATTERY 5000MAH 3.7V

Weight 83 g

DESCRIPTION

This 5000mah lithium-ion battery is small, light and durable. Through standard JST 2mm female connector, it will yield 3.7V which will supply your projects for a whole day (and night!). Furthermore, the battery has an implemented protection system, which prevents high voltages (prevents over-charging), undervoltage and short circuit. That way it protects the battery, increases its lifetime and protects you from possible accidents!

- **Nominal voltage:** 3.7V
- **Capacity:** 5000mAh, 18.5Wh
- **Dimensions:** 67.4 x 54.6 x 10.1mm
- **Standard JST-PH-2mm connector**

DISCLAIMER: This battery has to be charged with a special charged that uses **CC/CV** principle. Li-ion batteries are dangerous! Read our tutorial (link in the top right corner) before use.

FEATURES

- Nominal voltage: 3.7V
- Capacity: 5000mAh, 18.5Wh
- Standard JST-PH-2mm connector
- Dimensions: 67.4 x 54.6 x 10.1 mm / 2.7 x 2.1 x 0.4 inch
