

EASYC CABLE 6CM

Weight 3 g

DESCRIPTION

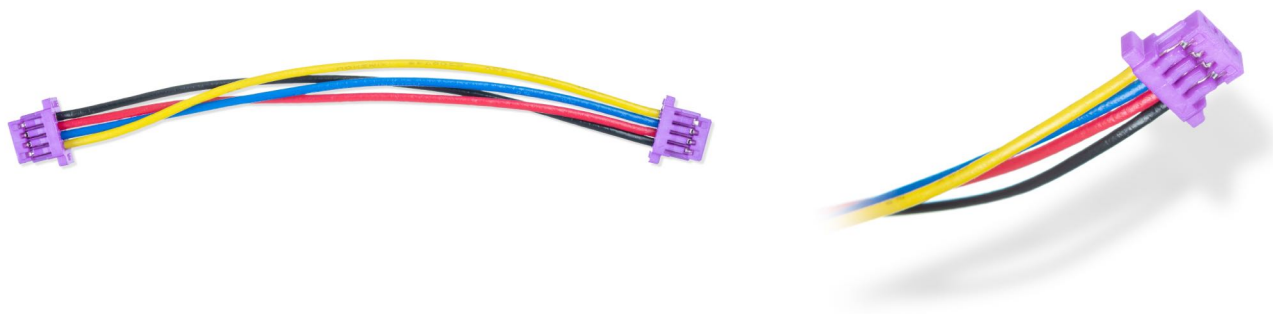

easyC is the system for simple connection of microcontroller boards, sensors, and actuators which allows fast prototyping without the possibility of error. The connection between modules occurs with simple and pre-assembled cables, and easyC modules have connectors corresponding to the cables. easyC is based on the I2C communication.

This product is easyC compatible cable with easyC connectors on both ends. Cable length is 6cm.
