

EASYC CABLE 10CM

Weight 3 g

DESCRIPTION

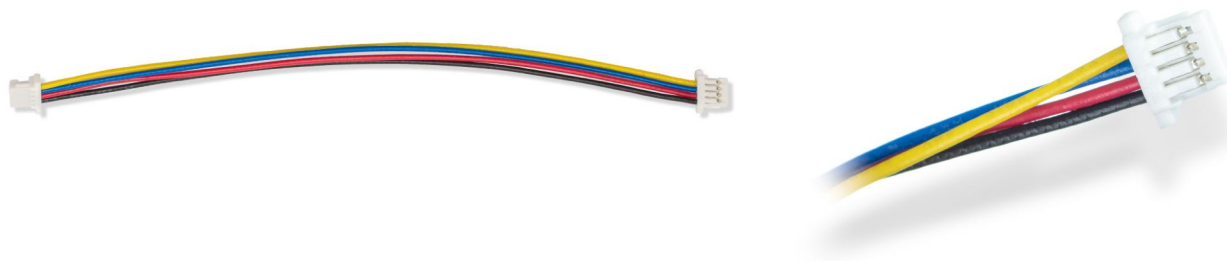

easyC system is for easy connection of microcontroller plates, sensors and actuators, which enables rapid prototyping without the possibility of error. The connection between the modules takes place with simple and pre-prepared cables, and easyC modules have connectors that fit the cables. easyC is based on I2C communication.

This product is easyC compatible cable, with easyC connectors on both sides length 10cm.
