

Reduce exposure to contaminated surfaces with a touchless tool

Eaton is committed to meeting your critical needs. At a time when personal protection is crucial, we can help. Designed with safety and sustainability at the forefront, Eaton's touchless tool protects by reducing the risk of exposure to potentially harmful surface-dwelling viruses and other substances. Easy to clean and sanitize between uses, the touchless tool is reusable, multi-purpose and comfortable to use. What's more, it easily attaches to a key ring or badge lanyard for easy accessibility.

Powering Business Worldwide

Eaton's touchless tool is designed to provide protection from surface-dwelling particles and substances. The tool is used to open doors and press buttons. With easy cleaning, the touchless tool can be endlessly reused.

We know you want to provide your employees with the right protective gear, and we're here to help. Because we make safe and sound work.
