

38999 Fiber Optic In-Line Splice

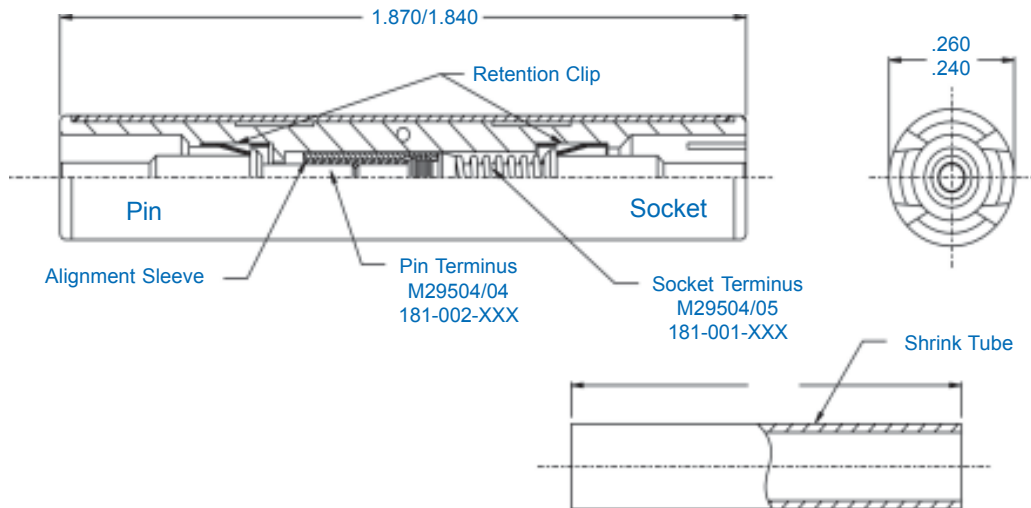

- Accepts M29504/04 and /05 Termini
- Accepts Glenair 182-001 and 182-001 Termini
- Beryllium Copper Retention Clips
- Supplied with Heat Shrink Tubing
- Stainless Steel Housing
- High temperature LCP Insert

Glenair In-Line Fiber Splices For Interconnecting M29504/04 and /05 Fiber Optic Termini

Offering snap-in convenience, these splices are intended for cable repair. The compact size allows the splice to be used as an interconnect device in applications where a multi-channel connector will not fit. The adhesive-lined Kynar® heat shrink tube provides environmental sealing and strain relief. The splice accepts standard M29504/04 and /05 termini. Labeling on the splice identifies the pin and socket ends. The stainless steel housing, the liquid crystal polymer insert and the beryllium copper retention clips guarantee rugged, reliable performance and precise fiber alignment.
