Product Information

Alcohol-Enhanced Presaturated Wipes - *ProClean* is the ideal general purpose surface cleaner for the electronics production line. It uses a strong, shred-proof disposable wipe saturated in a powerful cleaning fluid to easily remove rosin, fluxes, synthetic fluxes and most “no-clean” fluxes and pastes. With no rinsing required this slow drying cleaner has great materials compatibility, is ESD-safe and leaves no residue. It is ideal for perfectly clean SMT stencils, PC boards, components, displays, cables and connectors.

Money-saving refills are available from *MicroCare* (photo to the right). These contain the same wipes and cleaning fluid as the tubs above, but reduce costs and help protect the environment by encouraging the re-use of packaging. This cleaner is also available packaged in convenient aerosol containers.

AVAILABILITY: Stocked by MicroCare distributors world-wide. Contact MicroCare for a distributor near you. For more information contact MicroCare directly or visit www.MicroCare.com.
