#### BLM02KX180SN1#

"#" indicates a package specification code.

- 1. The chip ferrite beads BLM02K series is designed to function nearly as a resistor at noise frequencies, which greatly reduces the possibility of resonance and leaves signal wave forms undistorted. BLM02K series is effective in circuits without stable ground lines because BLM02K series does not need a connection to ground.
- 2. The nickel barrier structure of the external electrodes provides excellent solder heat resistance.
- 3.BLM02K series can be used in high current circuits due to its low DC resistance.
- It can match power lines to a maximum of 1.5ADC.
- 4. The small size of BLM02K series (0.4x0.2mm) is suitable for advanced high-density mounting.
