1 Overview

The **DT028DTFT-IPS** and **DT028DTFT-IPS-SHB** are 2.8" color IPS LCD modules, each composed of a LCD panel, display driver, FPC cable with SPI interface, and LED backlight. The display's active area has a resolution of 240 x 320 pixels. The **DT028DTFT-IPS-SHB**, with twice the number of backlight LEDs, is available as a "super high-bright" alternative to the **DT028DTFT-IPS**.

$$\text{Contrast Ratio} = \frac{\text{Surface Luminance}_{\text{WhitePixels}}}{\text{Surface Luminance}_{\text{BlackPixels}}}$$

7 Precautions for Use of LCD Modules

7.1 Safety

Liquid crystal in LCD is poisonous. Do not put in mouth. If liquid crystal comes in contact with skin or clothes, wash it off immediately using soap and water.

7.2 Handling

- A. The LCD panel is made of plate glass. Do not subject the panel to mechanical shock or excessive force on its surface.
- B. In order to ensure reliability, do not hold product by flexible printed circuit (FPC) cable.
- C. Provide space so that panel does not come into contact with other components.
- D. To protect the product from external force, apply a covering lens (acrylic board or similar) and keep an appropriate gap between them.
- E. Transparent electrodes may be disconnected if the panel is used in an environment where dew condensation is present.
- F. Properties of semiconductor devices may be affected when exposed to light, possibly resulting in IC malfunctions. To prevent such malfunctions, design and mounting layout should be done in such a way that IC is not exposed to light in actual use.

7.3 Static electricity

- A. Ground soldering iron tips, tools and testers when they are in operation.
- B. Ground your body when handling the products.
- C. Power on the LCD module before applying the voltage to the input terminals.
- D. Do not apply voltage which exceeds the absolute maximum rating.
- E. Store the products in an anti-electrostatic bag or container.

7.4 Storage

- A. Store product in a dark place at $+25^{\circ}\text{C} \pm 10^{\circ}\text{C}$ with low humidity (40% RH ~ 60% RH). Do not expose the display to sunlight or fluorescent light.
- B. Storage in a clean environment, free from dust, active gas, and solvent.

7.5 Cleaning

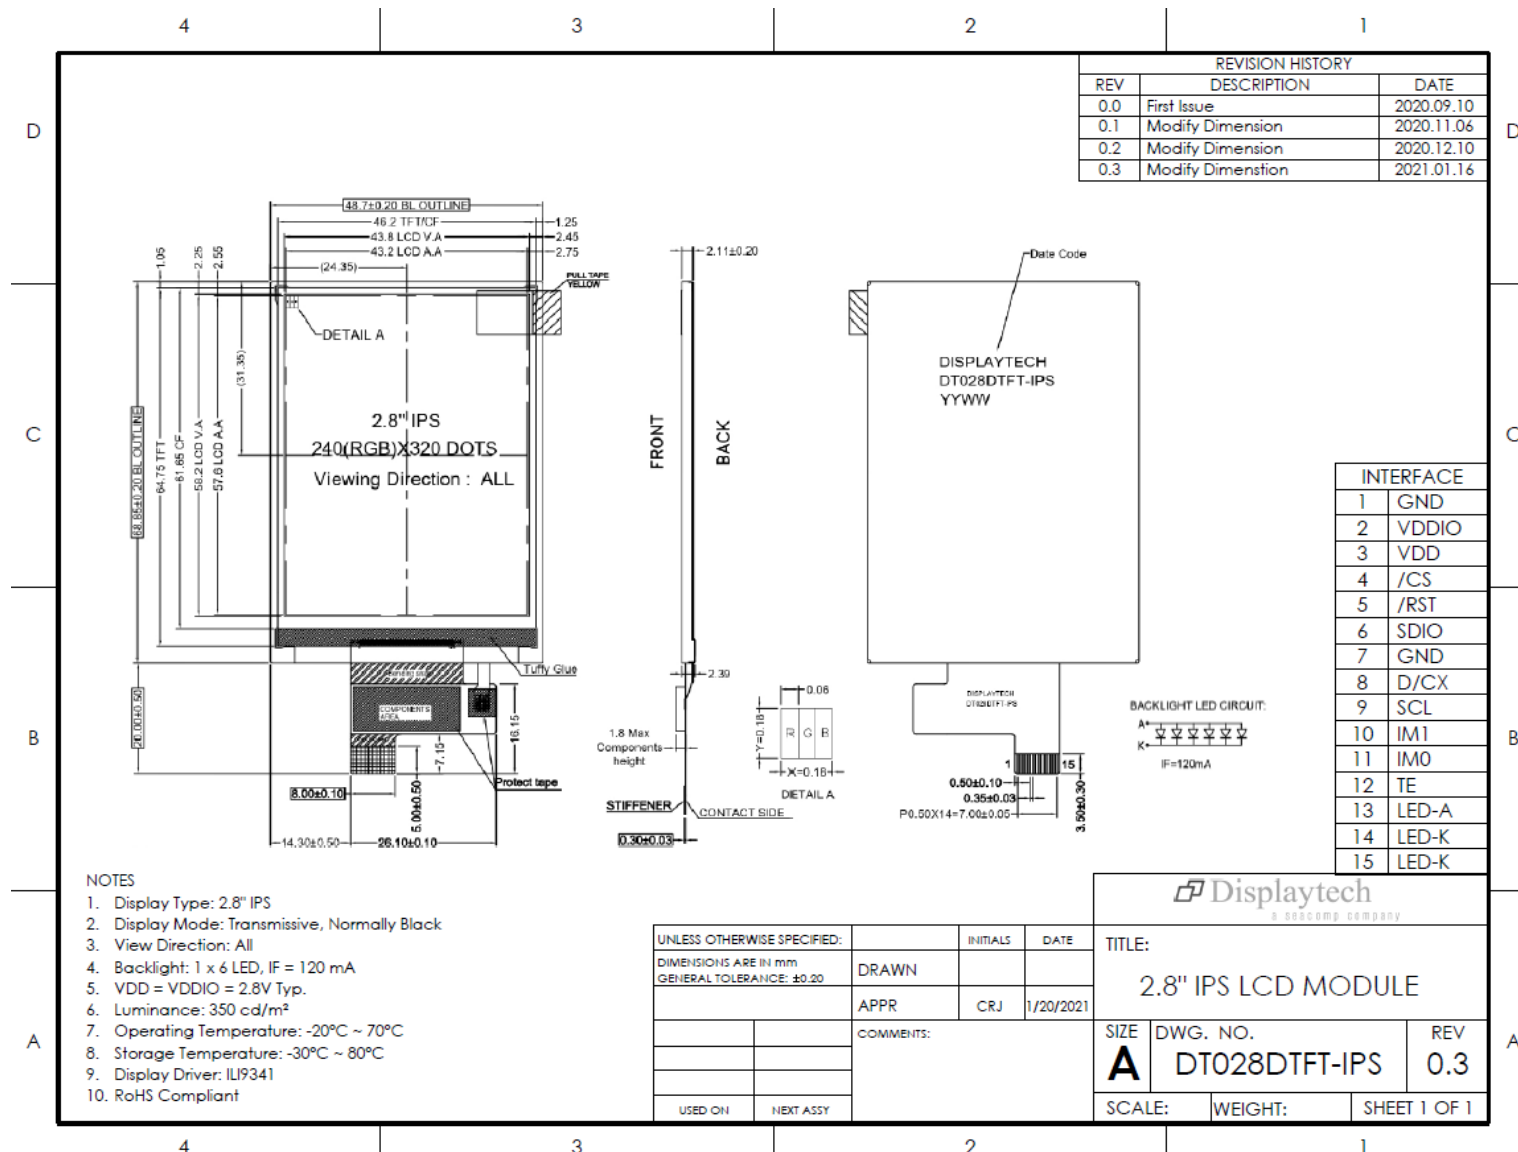

- A. To clean the product, wipe with a soft cloth moistened with ethanol. Do not allow ethanol to get between upper film and bottom glass, as this may cause peeling issues and/or defective operation. Do not use any organic solvent or detergent other than ethanol.

7.6 Cautions for installation and assembly

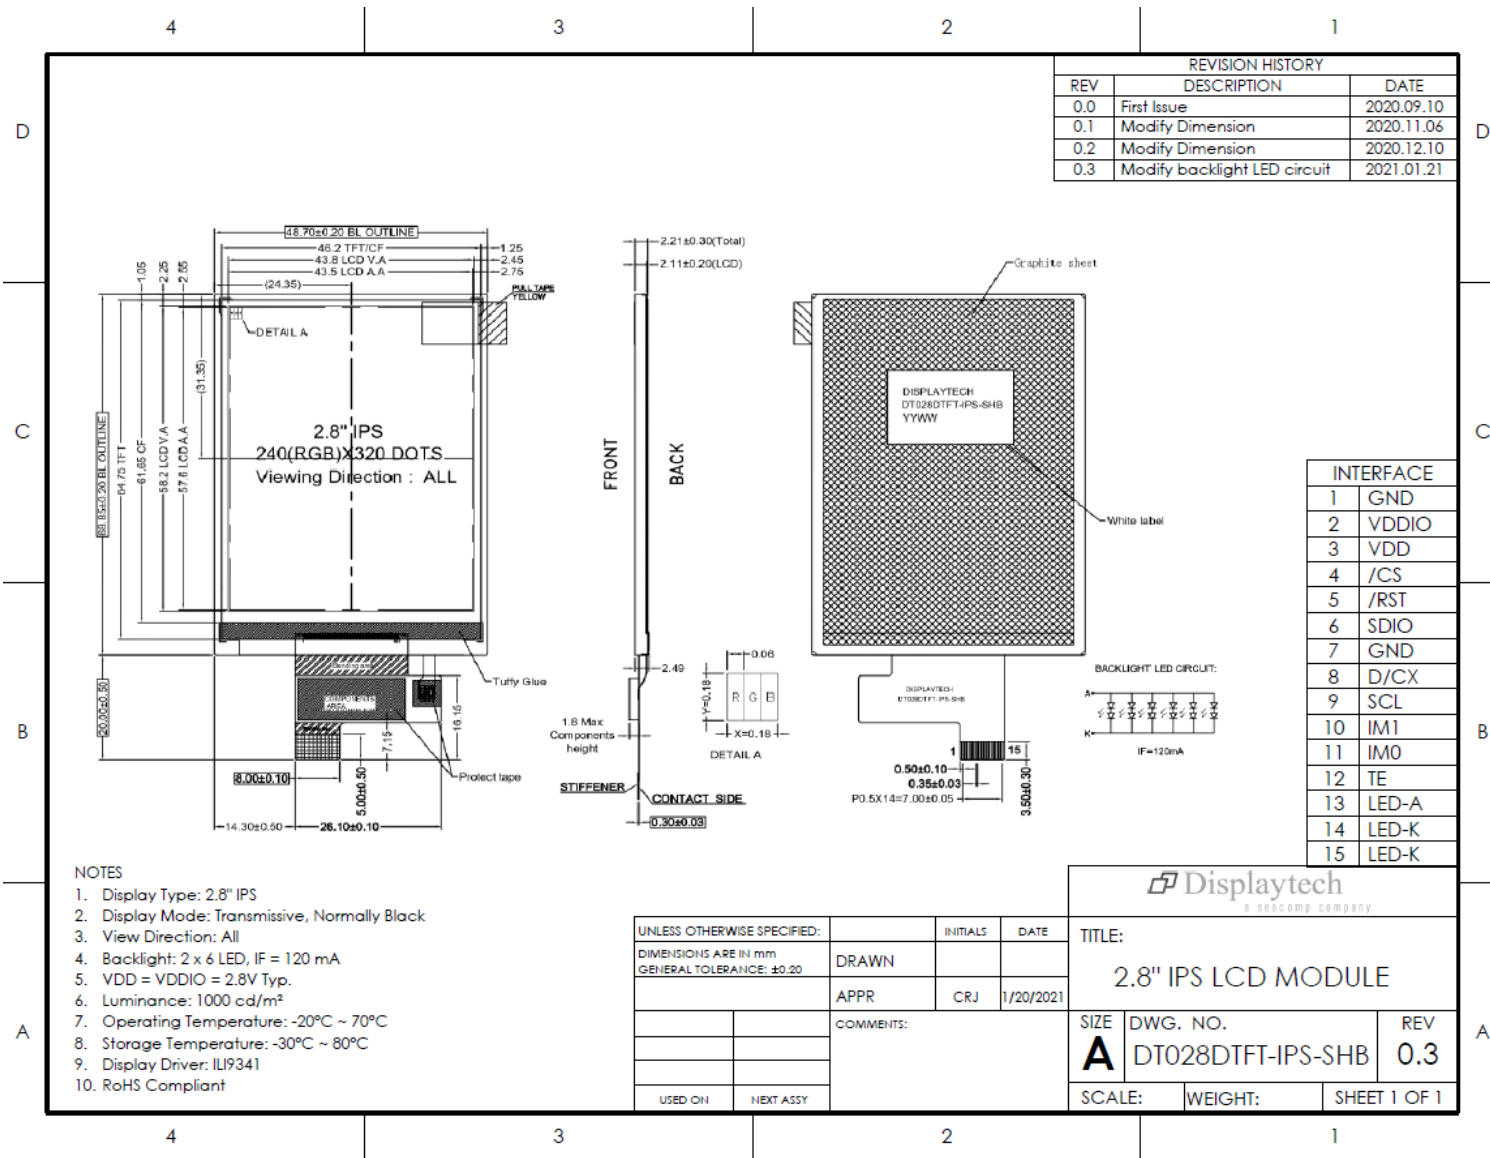

- A. Bezel edge must be positioned between Active area and Viewing area.
- B. For a stable display assembly, Displaytech recommends designing a support for the backside of the display.
- C. Do not display any fixed pattern for long periods of time. If a fixed pattern must be displayed, use a screen saver in order to avoid image persistence.
