## 12:1 Dual-Laser Infrared Thermometer

Laser dots indicate the measurement diameter:

The IR5 dual lasers assist in targeting the measurement area. The distance between the two laser spots on the surface of the object being measured approximates the diameter of the circular measurement area from which the infrared sensor is collecting data.

The IR5 is a professional dual-laser targeting infrared thermometer that offers a wide measurement range, a tight distance-to-spot ratio, and several calculation modes to facilitate different temperature measurement applications.

### Features:

- Dual-laser Targeting
- 12:1 Distance to spot ratio
- Auto Scan
- Max/Min/Avg/Diff
- High/Low Alarm
- Backlit Display
- Auto Power Off
- Adjustable Emissivity
