

# 086-SBSMR+ Model Series

DC to 18 GHz 50Ω

# **The Big Deal**

- Hand-formable with 6mm bend radius
- SMA-M right-angle to SMA-F bulkhead connectors
- Excellent return and insertion loss
- Ideal for assembled systems

CASE STYLE: KP1680

## Product Overview

086-SBSMR+ Series Hand-Flex coaxial cables are ideal for interconnecting coaxial components and sub-assemblies in a wide range of systems, including communications, military and aerospace, environmental and test chamber systems and more. The hand-formable cable provides a minimum bend radius of 6mm to accommodate tight layouts without the need for bending tools, adapters or brackets. SMA right angle to SMA bulkhead connectors make these cables ideal for perpendicular connections run directly to the front panel of rack-mounted equipment. The connectors feature an anti-torque nut to prevent cable stress during installation and an insulated outer jacket to minimize signal leakage. They are available in a range of lengths to meet a variety of connection requirements.

Feature	Advantages
Hand-formable RF cables	Facilitates the assembly of coaxial systems and sub-systems without the need for special cable-bending tools or adapters. Reduces the risk of damage during bending.
Tight bend-radius	6mm bend-radius makes the cable ideal for connections in tight spaces and crowded layouts.
18 GHz right-angle SMA connector	Meets requirements of 90° connections without bending and without sacrificing high-frequency performance.
18 GHz SMA bulkhead connector	Ideal for making secure connections directly through equipment chassis panels.
Excellent return loss	Suitable for interconnecting a variety of RF components while minimizing VSWR ripple contribution.
Good power handling • 211 W at 0.5 GHz • 35 at 18 GHz	Supports medium to high RF power levels used in transmit paths.
Anti-torque nut	Reduces risk of twist damage to cable during installation.

Notes

A Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document. B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions. C. The parts covered by this specification document are subject to Mini-Circuit's standard limited warranty and terms and conditions (collective), "Standard Terms"), Purchasers of this part are entitled to the rights and benefits contained therein. ### **Cable Construction**

## Features

- · Wideband frequency coverage, DC to 18 GHz
- · Low Loss. .6 dB at 18 GHz
- · Excellent Return Loss, 18 dB at 18 GHz SMA-F bulkhead connector at one end
- · Hand formable to almost any custom shape without special bending tools
- 6mm bend radius for tight installations
- · Anti-torque nut prevents cable stress during installation
- · Insulated outer jacket standard
- Connector interface, meets MIL-STD-348 · Ideal for interconnect of assembled systems

### Applications

- · Bulkhead connector mounts on front panel of equipment racks
- Replacement for custom bent 0.086" semi-rigid cables Communication receivers and transmitters
- · Military and aerospace system
- · Environmental and test chambers
