PRODUCT OVERVIEW

Mini-Circuits' BDCH-10-63+ is a high-power bi-directional coupler providing high power handling up to 180W and mainline loss of 0.1 dB. High directivity of 22 dB provides accurate sampling from the coupled port, and 25 dB return loss provides excellent matching over full frequency range. Covering frequencies from 2000 to 6000 MHz, the model supports a wide variety of applications from power amplifiers and antenna feeds to various digital communications and more. The coupler is designed into an open printed laminate (0.56" x 0.20" x 0.08") with wrap-around terminations for good solderability and easy visual inspection.
