# **Bi-Directional Coupler**

**BDCN-20-13+** 

20 dB Coupling 360 to 1000 MHz

## **The Big Deal**

- High Power handling (15W)
- Industry leading combination of size/bandwidth

CASE STYLE: FV1206-1

## **Product Overview**

Mini-Circuits new Bi-directional coupler BDCN-20-13+ offers an industry leading combination of operating bandwidth and size; The low insertion loss makes this component a versatile building block for use in a variety of systems and sub-system designs.

| Feature              | Advantages                                                                                                                                                                                                                                                  |  |  |  |  |  |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|
| Small Size           | Offered in the FV1206-1 package size, the BDCN-20-13+ offers an industry leading combination of size, bandwidth and frequency. The small footprint (3.2mm x1.6mm) allows for reduced parasitics in systems with improved performance and simplified layout. |  |  |  |  |  |
| Low Loss             | The .15 dB typical insertion loss make this design ideal for power monitoring, signal conditioning, and open circuit, fault protection circuits.                                                                                                            |  |  |  |  |  |
| High Power handlingl | Capable of operating up to 15W, the LTCC construction of the BDCN-20-13+ makes this bi-directional coupler a robust, rugged product that can be used effectively in either the transmit or receive paths.                                                   |  |  |  |  |  |

Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits" website at www.minicircuits.com/MCLStore/terms.jsp

#### Demo Board MCL P/N: TB-255+ Suggested PCB Layout (PL-131)

1.TRACE WIDTH IS SHOWN FOR ROGERS RO4350B WITH DIELECTRIC THICKNESS 0.020" ± 0.0015"; COPPER: 1/2 OZ. EACH SIDE. FOR OTHER MATERIALS TRACE WIDTH MAY NEED TO BE MODIFIED.

2.BOTTOM SIDE OF THE PCB IS CONTINUOUS GROUND PLANE.

DENOTES PCB COPPER LAYOUT WITH SMOBC (SOLDER MASK OVER BARE COPPER) DENOTES COPPER LAND PATTERN FREE OF SOLDER MASK

#### **Features**

- four-port coupler
- excellent VSWR, 1.2:1 typ., all ports
- ultra small size, hermetically sealed
- minimal variation with temperature variation
- protected by US Patent 7,049,905
- DC current through input to output 0.5A Max. at 1.0 watt RF input power

#### **Applications**

UHF communication
