The Big Deal

- Narrow bandwidth
- High Rejection
- Good VSWR
- Shielded package

Product Overview

BPF-F100+ is a 50Ω bandpass filter in a shielded package fabricated using SMT technology. This bandpass filter covers from 95 to 105 MHz. This unit uses a miniature high Q capacitors and wire welded inductors for high reliability, It has repeatable performance across production lots and consistent performance across temperature.

Key Features

Feature	Advantages				
Narrow bandwidth filter	Narrow bandwidth with fast roll-off, this will attenuate frequencies closer to the passband with good rejection value of > 40 dB which increases selectivity on the adjacent channel				
Good rejection	This enables the filter attenuate spurious signals and reject harmonics for broad frequency band.				
Shielded package	The small surface mount package enables the BPF-F100+ to used in compact design
