## Surface Mount

# Coaxial-Ceramic Resonator Filters and Multiplexers

DC to 6 GHz  $50\Omega$ 

# The Big Deal

- Low insertion loss with excellent power handling
- Passbands up to 6 GHz
- Fractional bandwidth from <1 to 25%</li>
- Low profile designs with min. height of 0.120"
- Excellent temperature stability
- Rugged construction to handle demanding environmental conditions

### **Product Overview**

Mini-Circuits' Coaxial-Ceramic Resonator filters offer low insertion loss in very small form factors, using ceramic material with high dielectric constant and superior Q factor. Bandpass and bandstop filters, diplexer and multiplexer designs can be constructed using this technology. Low insertion loss combined with excellent power handling makes these filters well suited for transmitter and receiver signal chains. Advanced filter design and construction can achieve stopband width greater than 3x the center frequency as high as 20 GHz.

All our coaxial-ceramic resonator filters are built with rugged construction, qualified to withstand multiple demanding reflow cycles. Excellent repeatability across units is achieved through precise tuning and process control.

# **Key Features**

| Feature                  | Advantages  |
|--------------------------|---|
| Low insertion loss       | Low signal loss results in better SNR in signal chain   |
| Fast roll-off            | Higher selectivity results in better adjacent channel rejection and dynamic range   |
| Wide stop band           | Wide spur-free stopband results in better receiver sensitivity  |
| Excellent power handling | Well suited for transmitter applications  |
| Rugged Construction      | These filter assemblies have been qualified over a wide range of thermal, mechanical and environmental conditions including withstanding the stress of extensive solder reflow cycles |
| Small Size               | Very well suited for high performance applications where size is a constraint.  |
| Temperature stability    | Very minimal change in electrical performance across temperature makes these filters suitable for a wide range of operating conditions.   |

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document

A. Performance and quality attributes and continuous not expenses y stated in this specification occurrent are interned to be excluded and to find form a part or this specification as B. Electrical specifications and performance data contained in this specification document are becomen the part of the specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp

| RF Power Input*       | 6W Max. @ 25°C |

Permanent damage may occur if any of these limits are exceeded.

# **Applications**

**Features** 

• Industrial / Business Radio pool

• High selectivity <2% Bandwidth

- · Private and public land mobile
- · Test and measurement

· High rejection, 70 dB typ.

· Miniature shielded package

#### **Functional Schematic**
