

## MMIC SURFACE MOUNT

# X3 Frequency Multiplier

## CY3-453+

50Ω Output 20 to 45 GHz

### THE BIG DEAL

- Wideband Output From: 20 to 45 GHz
- Outstanding Fundamental and Close-in Harmonic Suppression:
  - F1: 39 dBc Typ.
  - F2: 46 dBc Typ.
  - F4: 40 dBc Typ.
- Input Drive Level: +12 to +17 dBm
- Conversion Loss: 20 dB Typ.
- Tiny Size, 4x4mm 24-Lead, QFN-Style

Generic photo used for illustration purposes only

### APPLICATIONS

- 5G MIMO and Back Haul Radio Systems
- Satellite Communications
- Test and Measurement Equipment
- Radar, EW, and ECM Defense Systems

### FUNCTIONAL DIAGRAM

### PRODUCT OVERVIEW

Mini-Circuits' CY3-453+ is a wideband MMIC Frequency Tripler, converting input frequencies from 6.66 to 15 GHz into output frequencies from 20 to 45 GHz. Its wide output range makes this model suitable for broadband systems as well as a wide variety of narrow-band applications. Utilizing GaAs HBT technology, the CY3-453+ comes housed in a 4x4mm 24-Lead QFN-Style package and offers excellent repeatability, low inductance, and good thermal efficiency.

### KEY FEATURES

| Features                                                                                                                                                             | Advantages                                                                                                                                                                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Broadband, 20 to 45 GHz output                                                                                                                                       | With an output frequency range spanning 20 to 45 GHz, this multiplier supports broadband applications.                                                                       |
| Excellent Fundamental and Harmonic Suppression <ul style="list-style-type: none"><li>• F1, 39 dBc Typ.</li><li>• F2, 46 dBc Typ.</li><li>• F4, 40 dBc Typ.</li></ul> | Harmonic and fundamental filtering requirements are dramatically simplified due to the high suppression resulting from internal cancellation within the diode configuration. |
| Wide input power range<br>+12 to +17 dBm                                                                                                                             | Wide input power signal range accommodates different input signal levels while still maintain a low conversion loss.                                                         |

## ABSOLUTE MAXIMUM RATINGS<sup>5</sup>

| Parameter                           | Ratings                                        |
|-------------------------------------|------------------------------------------------|
| Operating Temperature (ground lead) | -40°C to +85°C                                 |
| Storage Temperature                 | -65°C to +150°C                                |
| RF Input Power                      | +26 dBm (5 minute max)<br>+23 dBm (Continuous) |

5. Permanent damage may occur if any of these limits are exceeded. Electrical maximum ratings are not intended for continuous normal operation.

## ESD RATING

|     | Class | Voltage Range   | Reference Standard          |
|-----|-------|-----------------|-----------------------------|
| HBM | 1B    | 500V to < 1000V | ANSI/ESDA/JEDEC JS-001-2017 |
| CDM | C2    | 500V to < 1000V | JESD22-C101F                |

ESD HANDLING PRECAUTION: This device is designed to be Class 1B for HBM. Static charges may easily produce potentials higher than this with improper handling and can discharge into DUT and damage it. As a preventive measure Industry standard ESD handling precautions should be used at all times to protect the device from ESD damage.

## MSL RATING

Moisture Sensitivity: MSL1 in accordance with IPC/JEDEC J-STD-020E/JEDEC J-STD-033C

50Ω    Output 20 to 45 GHz

## NOTES

- A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
- B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
- C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the standard terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at [www.minicircuits.com/terms/viewterm.html](http://www.minicircuits.com/terms/viewterm.html)
