# Surface Mount **Monolithic Amplifier**

## DC-6 GHz

#### **Product Features**

- High gain, 25.6 dB typ. at 100 MHz
- High IP3, 38 dBm typ.
- High Pout, P1dB 21.9 dBm typ.
- Internally Matched to 50 Ohms
- Transient Protected
- Excellent ESD Protection
- Unconditionally stable
- Aqueous washable
- Protected by US Patent 6,943,629

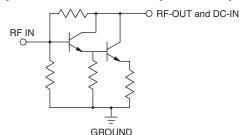

#### **Typical Applications**

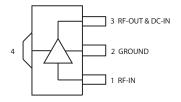

- Base station infrastructure
- Portable Wireless
- CATV & DBS
- MMDS & Wireless LAN

#### **General Description**

Gali-84+ (RoHS compliant) is a wideband amplifier offering high dynamic range. Lead finish is SnAgNi. It has repeatable performance from lot to lot, and is enclosed in a SOT-89 package. It uses patented Transient Protected Darlington configuration and is fabricated using InGaP HBT technology. Expected MTTF is 1200 years at 85°C case temperature. Gali=84+ is designed to be rugged for ESD and supply switch-on transients.

#### simplified schematic and pin description

| Function         | Pin Number | Description  |  |
|------------------|------------|--|--|
| RF IN            | 1          | RF input pin. This pin requires the use of an external DC blocking capacitor chosen for the frequency of operation.  |  |
| RF-OUT and DC-IN | 3          | RF output and bias pin. DC voltage is present on this pin; therefore a DC blocking capacitor is necessary for proper operation. An RF choke is needed to feed DC bias without loss of RF signal due to the bias connection, as shown in "Recommended Application Circuit". |  |
| GND              | 2,4        | Connections to ground. Use via holes as shown in "Suggested Layout for PCB Design" to reduce ground path inductance for best performance.  |  |

A Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document. B. Electrical specifications and performance data contained in this specification document are based on Nini-Circuit's applicable established test performance criteria and measurement instructions. G. The parts covered by this specification document are subject to Mini-Circuit shandard limited warranty and terms and conditions (collectively, "Standard Terms"), Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuit's website at www.minicircuits.com/MCLStore/terms.jsp

+RoHS Compliant The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications
